

Qorvo Policy on Conflict Minerals 25-Apr-2016

Qorvo shares in the global concerns regarding human rights abuses related to the illegal mining and trade of “conflict minerals” (tin, tantalum, tungsten and gold) in the Democratic Republic of Congo (“DRC”) and its adjoining countries (collectively, the “Covered Countries”). Such activities have been linked to financing armed conflict and violence in the region, and Qorvo is committed to ensuring that our activities do not contribute to the issue. At the same time, we continue to support the responsible sourcing of minerals within the Covered Countries, and will not institute a ban on all conflict minerals coming from the region.

We have aligned our Conflict Minerals Program with the *Organization for Economic Co-operation and Development (OECD) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas*, and we encourage our suppliers to do the same. Suppliers are expected to cooperate in providing due diligence information to confirm that the relevant products supplied to Qorvo are conflict-free.

As a member of the Conflict-Free Sourcing Initiative (“CFSI”), we will continue to actively participate on teams to determine if facilities are smelters; engage smelters in the Conflict-Free Smelter Program (“CFSP”); manage tools for CFSI members to determine the status of facilities supplied to them by their supply chains; and develop best practices for supply chain due diligence.

We will update our Conflict Minerals Reporting Templates (“CMRTs”) on a bi-annual basis, in order to assist our customers with their supply chain due diligence programs. We will continue to work with our supply chain to update this information and implement other appropriate due diligence measures as necessary.

For more information on Qorvo’s Conflict Minerals Program, please refer to our webpage at: <http://www.qorvo.com/about-us/corporate-social-responsibility/product-compliance>.
