

Did you know?

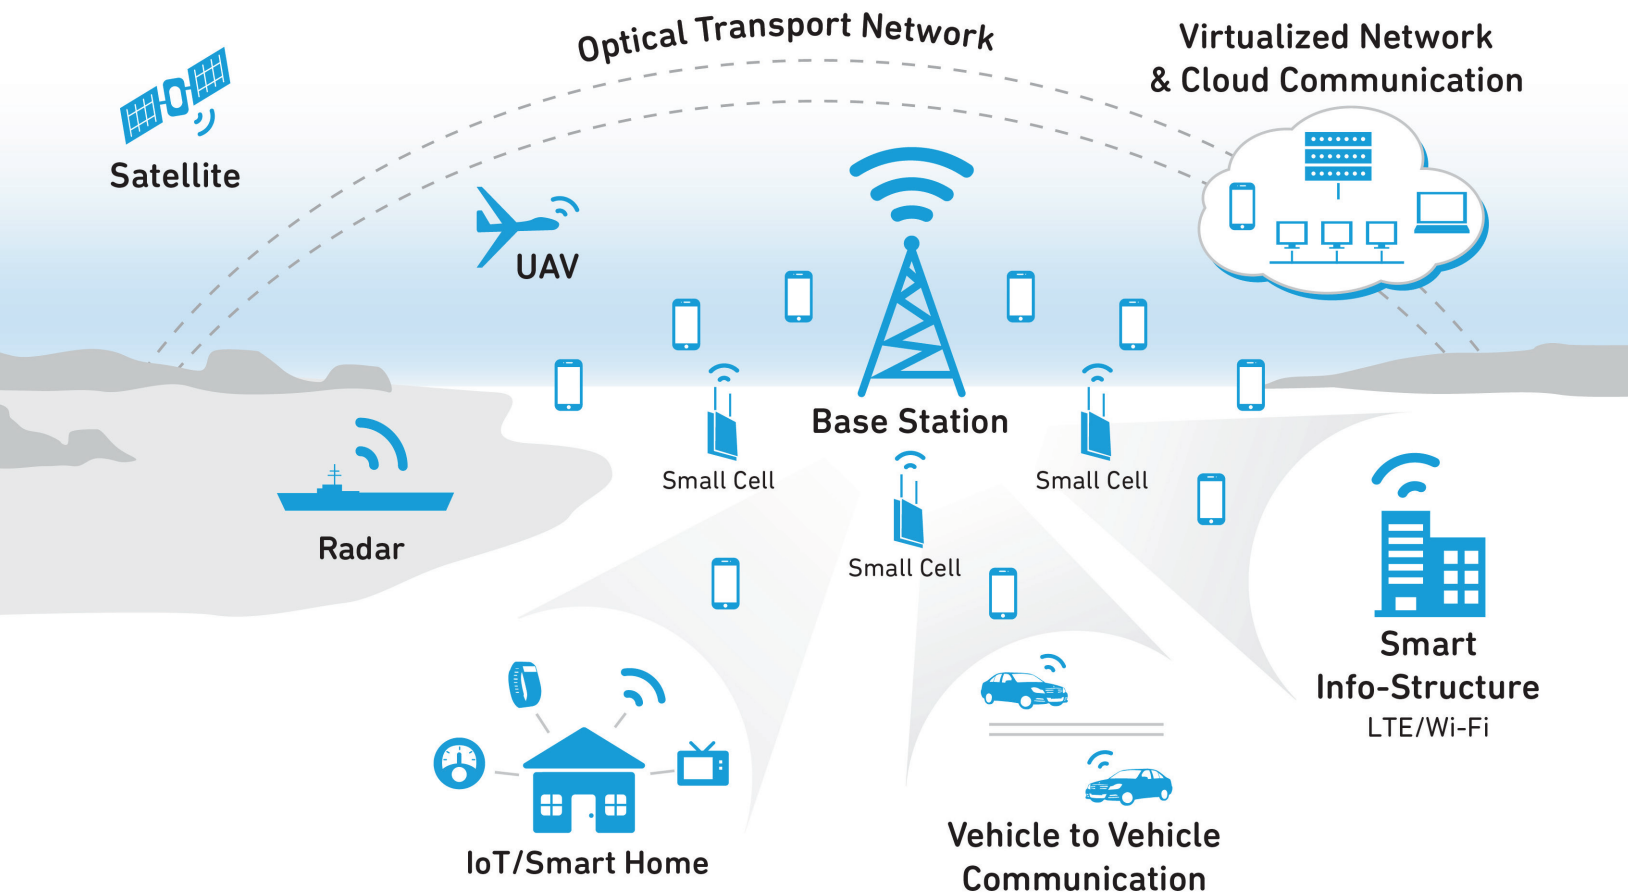

More than 50% of the world does not have internet access.

Qorvo® is passionate about improving global connectivity. Everyday our core RF solutions are at work – in satellites, optical networks, drones, cars, smartphones, 5G network trials and beyond.

We work with leading companies to architect next-generation connectivity and create solutions for the toughest network challenges. We want to help you develop global networks to connect the most remote parts of the world.

**You make a better world possible.
And Qorvo can help you deliver it.**

All around you, Qorvo is accelerating a new generation of RF.

Qorvo offers the industry's broadest portfolio of critical enabling technologies to develop and commercialize tightly integrated solutions at industry-leading performance levels. We provide standard and custom product solutions for the mobile, infrastructure and defense markets, as well as strategic foundry services. Qorvo has design, manufacturing, applications engineering and sales/support facilities around the globe.

Key Applications Automotive | Base Stations | CATV Networks | Customer Premise Equipment (Wi-Fi Access Points and Smart Meters) | Defense & Aerospace | Gateways/Set-Top Boxes | IoT (Internet of Things) | Mobile Devices | Optical Networks | Radar | Satellites

Key Products Amplifiers | Communication SoCs (Systems on a Chip) | Control Products | Discrete Components | Filters & Duplexers | Frequency Converters | Integrated Modules | Optical Components | Oscillators | RF Fusion™ and RF Flex™ Integrated Modules | Switches | Transistors and ICs
