This past year created unprecedented challenges and demonstrated the importance of keeping the world connected. As a leader in wireless and wired connectivity, we are proud of Qorvo’s ability to keep employees safe while delivering for our customers, suppliers and communities during a period of uncertainty and change.

In this report, we describe many of the actions we have taken to address sustainability. To name a few, these include our commitments to:

- **Our people**, to ensure a safe and healthy work environment, and encourage engagement and development.
- **Our partners**, with high standards for our suppliers to support responsible sourcing and quality.
- **Our planet**, through focused efforts to minimize our environmental impact.

We are pleased with the progress and accomplishments described in this report. And we remain committed to taking important steps forward to address the environmental, social and governance issues important to our investors, customers, employees, and other stakeholders, while creating shareholder value.

We will continue to protect and support our people, engage with the right partners, and take steps to protect the environment, as we solve our customers’ toughest challenges and help keep the world connected.

ROBERT A. BRUGGEWORTH, CHIEF EXECUTIVE OFFICER
Qorvo is a leader in the development and commercialization of technologies and products for wireless and wired connectivity.

- **Mobile**
- **Infrastructure**
- **Aerospace/Defense**
- **Internet of Things (IoT)**

**8,400+ employees worldwide**

We employ 8,400+ people who are dedicated to delivering innovative technologies.

**COMBINED EFFORT**

We collaborate with the top researchers, universities and experts around the world.

**FACILITIES**

We operate world-class ISO 9001-, ISO 14001- and IATF 16949-certified manufacturing facilities.

**S&P 500 (QRVO)**

Information on current financial reporting can be found on our investor page on Qorvo.com.

**FY21 Product Highlights**

Qorvo considers sustainability when researching, designing, and building its products. Recent product offerings include:

- Single-chip motor control and inverter solution for brushless DC (BLDC) motors that enable high-performance motor control with extended battery life.
- Wi-Fi 6E FEMs, which deliver robust and rugged performance with world-class energy efficiency.
- Ultra-wideband proximity awareness applications.
- Qorvo Biotechnologies Omnia™ SARS-CoV-2 Antigen Test.*

*This product has not been FDA cleared or approved, but has been authorized by FDA under an EUA for use by authorized laboratories. This product has been authorized only for the detection of proteins from SARS-CoV-2, not for any other viruses or pathogens; and the emergency use of this product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostics for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Federal Food, Drug and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

CORPORATE GOVERNANCE

Our Code of Business Conduct and Ethics holds all directors, officers and employees of Qorvo accountable to the highest level of ethical standards.

We expect our employees to:

• Be honest and fair in all their business dealings, with both fellow employees and people outside the organization.

• Focus on customer service and to promote excellent relationships with our suppliers.

• Understand and work hard to achieve our company goals.

• Meet the highest ethical standards in all company activities.

EFFECTIVE WORKER FEEDBACK CHANNELS

Qorvo has developed multiple channels to encourage worker feedback. Channels include suggestion boxes, a dedicated Compliance Officer email account, and an anonymous hotline and online portal managed by an independent third party. Information received by Qorvo management on behalf of employees will be reviewed by leadership and responded to promptly. More information on our Whistleblower policy and Qorvo investigation methods can be viewed on our Investor portal by accessing the Whistleblower policy or Code of Business Conduct and Ethics policy.
CORPORATE GOVERNANCE

BOARD OF DIRECTORS
The Board of Directors (the “Board”) has adopted Corporate Governance Guidelines to promote the effective functioning of the Board and its committees and to ensure a common understanding among individual directors and management concerning the operation of the Board and its committees. Our Board members possess a broad and diverse range of skills, industry and other knowledge and expertise useful for the oversight of Qorvo business. When searching for new director candidates, the Board will actively seek highly qualified women and individuals from minority groups to include in the pool of director candidates from which nominees are selected. Three of the nine director nominees standing for election at the 2021 Annual Meeting of Stockholders have gender, racial or ethnic diversity.

EXECUTIVE LEADERSHIP
Oversight related to environmental, social, governance (ESG) activities begins at the Board (Governance and Nominating Committee), and includes engagement from executive leadership, CSR steering committee, and factory management. Progress toward various ESG business objectives is monitored monthly at the business level and reported to the Board on a periodic basis.

FY21 Sustainability Report | Qorvo
We hold our suppliers to our high standards, and those required by our customers and the Responsible Business Alliance (RBA). Through regular engagements, supply chain assessments and training opportunities, we take affirmative steps to ensure that our suppliers understand Qorvo’s expectations for maintaining a socially responsible supply chain.

Qorvo’s management system aligns with the RBA Code of Conduct. We utilize tools such as the RBA’s SAQ to conduct supply chain assessments and mitigate potential risks. Our strategic suppliers are requested to complete third-party audits, which review compliance against the RBA Code. We also utilize RBA resources, such as the eLearning platform, RBA data analytics, and risk heat maps to better understand potential risks in our supply chain.

Our requirements are communicated through multiple channels, including Qorvo’s external website, supplier portals, and contract provisions. All suppliers are required to comply with applicable laws and regulations in countries where they operate, in addition to complying with Qorvo requirements and the RBA Code. Suppliers are expected to acknowledge such requirements through our contract language and supplier code requirements as provided through the supplier portal.

Our supply base is constantly evolving. Qorvo strives to safeguard labor rights and improve working conditions within our supply chain through long-term agreements (LTAs). We target 100% of our strategic suppliers to have LTAs in place. An annual review of strategic suppliers as well as continuous rationalizing of our overall supply chain allows Qorvo appropriate oversight and leverage, where possible, for RBA code compliance.

More information about supplier requirements can be found on Qorvo.com.

https://www.qorvo.com/resources/d/qorvo-business-conduct-requirements-for-suppliers-contractors-consultants

https://www.responsiblebusiness.org/code-of-conduct/

RBA audits utilize third-party auditors to review the following topics: Labor/Human Rights, Ethics, Environment, and Health and Safety.
OUR APPROACH
Qorvo is committed to minimizing the environmental impact of its products while complying with all applicable laws and regulations regarding banned and restricted substances. This starts with restricting the use of chemical substances that have been identified as hazardous to human health or the environment in our processes and products – from the starting materials to assembly and shipping materials.

All new substances used in a product or at a manufacturing/assembly location follow a chemical review process to ensure the substances meet legal and customer requirements. This includes vetting suppliers during the supplier selection process to ensure they meet compliance requirements.

In FY21, approximately 18% of our products (by revenue) contained IEC62474 declarable substances. For more information about our product compliance program, including a REACH policy statement, please visit our website.
OUR COMMITMENT
Qorvo is committed to responsible mineral sourcing and strives to conduct activities that respect and support human rights throughout its global supply chain. Although we do not purchase minerals directly from mining companies or smelters/refiners (SORs), we actively engage with our suppliers to conduct due diligence in alignment with the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected & High-Risk Areas (OECD Guidance).

SUPPLIER EXPECTATIONS
Suppliers that provide Qorvo with components and/or materials containing relevant minerals are expected to comply with the requirements outlined in our responsible mineral specification, SPE-001288. For the purposes of Qorvo’s program, relevant minerals currently include tin, tantalum, tungsten and gold (also referred to as “conflict minerals” or “3TG”; cobalt; and any other mineral identified by Qorvo as contributing possible risk to the supply chain.
OUR PEOPLE

Our employees are redefining what’s possible in how we solve customer problems and deliver products that make electronics smarter and more efficient. We are committed to providing an environment that brings people together to learn and collaborate in response to both business and individual needs.
**OUR PEOPLE**

FY21 Sustainability Report
HEALTH & SAFETY

At Qorvo, we are committed to providing a safe work environment. Our strong safety culture, which includes the utilization of hierarchy of controls, and near miss and injury reporting, produce a recordable rate below industry average.¹

Hierarchy of control is used within Qorvo when determining the best way to keep workers safe. The most optimal solution when dealing with a risk is to eliminate that potential risk. However, that is not possible in some of our production processes. Therefore, Qorvo’s EHS team completes job hazard assessments to determine the best possible protections for its workforce. Risk assessments are completed prior to the installation of any new machinery as well as prior to the introduction of any new chemical processes. Workers receive training on minimizing any risks that cannot be eliminated.²

Established worker health and safety management teams are critical in fostering a positive health and safety culture. These teams encourage workers to utilize our online near miss and accident reporting system, a system critical to prevent worker injury. In order to understand and prevent occurrences in the future, our teams review 100% of reports received through the system.

These management practices have driven our corporate recordable rate down year over year. Compared to the most recently published data from the United States Bureau of Labor Statistics (BLS), Qorvo’s recordable rate (0.22) is significantly lower than the semiconductor average (0.9).

¹ US BLS (2019) for NAICS Code 33413, total recordable cases for semiconductor and other electronic component manufacturing was 0.9 Link: Incidence rates of nonfatal occupational injuries and illnesses by industry and case types, 2019 (bls.gov)

² Each Qorvo location keeps a safety data sheet (SDS) list of approved chemicals that can be accessed by workers (online or next to the chemicals). Training is provided to all employees who work with or have potential chemical exposures. In FY21, all workers completed site specific hazard communication training.
OUR PEOPLE

HEALTH & SAFETY

KEEPING WORKERS HEALTHY AND SAFE DURING THE PANDEMIC

In response to COVID-19, Qorvo developed an information hub to provide direction to management and workers during these unprecedented times. The purpose was to define and communicate the actions that Qorvo is taking to prevent the spread of COVID-19 within Qorvo while allowing for business operations to continue and to comply with all federal, state, and local requirements.

This information hub covers all Qorvo facilities worldwide and specifically addresses Qorvo’s response to the COVID-19 pandemic. Information includes employee travel, visitor access, internal protective measures including social distancing and cleaning, confirmed case response, and elevated body temperature screening procedures for all Qorvo locations in response to the evolving COVID-19 global health risk.

WEAR A MASK

1. WASH HANDS

2. SOCIAL DISTANCE

3. STAY HOME IF SICK

4. CLEAN SURFACES

5. WEAR A MASK

ADDITIONAL HEALTH & SAFETY MEASURES IMPLEMENTED BY QORVO INCLUDED:

- Established COVID-19 response team and provided COVID-19 training for workers.
- Conducted temperature screenings, enhanced cleaning measures, and social distancing at all locations.
- Implemented a security health screen COVID-19 questionnaire for contractors and visitors.
- Pivoted to a work from home model for those employees able to do so in response to COVID-19 health and safety guidelines. Additionally, those workers were provided with an allowance for ergonomics home office equipment, to ensure worker health and safety occurred in the office and while working at home.
Our people are at the core of what we do. Whether it’s our internship program or our technical ladder, Qorvo recognizes that it succeeds through its employees.

**TECHNICAL LADDER:**
Qorvo has established a technical ladder creating a career track emphasizing technical development and achievement.

The technical ladder provides technical engineering employees with:

- Expanded career options
- Recognition and rewards for technical talent and achievement
- Development opportunities for high-potential employees
- Opportunities for increased scope or depth in their field of engineering
- Prospects for job rotation into additional engineering disciplines

Qorvo University provides workers with an opportunity to increase their skillset. In FY21, over 300 courses were offered to employees that range from soft skills to specific technical content to help them in their current role or prepare them for future roles.

All Qorvo employees are engaged in Voyage, a journey between employee and manager to identify and strengthen Qorvo productivity and set up workers for further success. Typical performance reviews focus on past performance. Voyage, however, helps foster the employee’s future success.

**Creating a Pipeline for Talent:**
Currently enrolled undergraduates and graduate students in an accredited program with plans to return to school are eligible for Qorvo internships. Typical summer internships last 10-12 weeks. In FY21, our worldwide interns actively participated in collaborating, designing and developing Qorvo solutions for a wide variety of applications.
The Women in Tech (WIT) group aspires to foster a culture where women thrive through an inclusive forum that promotes career development and mutual growth for all involved. The members are STEM advocates to people from diverse backgrounds, both within Qorvo and via community outreach. Qorvo’s WIT:
- Promotes career development and mutual growth and encourages women to pursue leadership roles and opportunities for greater influence and impact at Qorvo
- Welcomes all associates, technical and non-technical
- Works to understand the unique needs of women in a male-dominated environment
- Helps build communities where girls and women flourish

Qorvo’s Veterans Enablement & Troop Support (V.E.T.S.) group’s mission is to recognize, connect, engage, and focus the energy and experience of Qorvo’s Service members’ community. Its goal is to promote the collective experience of all members to enhance professional career development, and work productivity. Qorvo’s V.E.T.S:
- Fosters a military/veteran-friendly environment at Qorvo
- Facilitates a network of Qorvo employees that share an interest in the military community
- Supports Qorvo employees that serve in the military and their family members during service member’s deployment
- Facilitates the onboarding, coaching and mentoring of veterans at Qorvo
- Enhances recruitment of candidates with military experience

NextGen is a group of Qorvo influencers – coming together with diverse backgrounds, skills and mindsets. The aim: to cultivate an environment that inspires the next generation of employees. Qorvo’s NextGen:
- Builds community and culture to make Qorvo an even more awesome place to work
- Promotes learning and networking
- Expands learning through discussion of ideas and topics
- Defines what Qorvo will be for employees moving forward

Qorvo’s I:Q group is focused on fostering, both internally and externally, a corporate culture that is proactively inclusive and welcoming towards all people. Qorvo’s I:Q:
- Creates a forum for an open dialogue and a willingness to learn about our similarities, differences, and shared experiences
- Nurtures the inclusiveness and diversity of our organization
- Unlocks new ideas and celebrates Qorvo’s success as an employer of choice
- Engages with communities in which our employees work and live

To deliver on our commitment, we have multiple measures in place. We focus on attracting and retaining employees with competitive compensation and benefit packages. We also use a combination of total rewards and other programs, including performance bonuses, stock awards, an employee stock purchase plan and numerous health and wellness benefits and programs.¹ We provide a safe and engaging work environment that has resulted in our worldwide turnover being significantly less than the high tech average. Qorvo monitors employee satisfaction through multiple channels, including but not limited to worker feedback, our open-door policy, and the Qorvo Employee Networks (known as QNet).

¹ Learn more about our benefits here: Life at Qorvo - Qorvo
Qorvo is committed to the continual improvement of our Environmental Management System (EMS). The system is designed to promote environmental stewardship, prevent pollution, and meet all applicable environmental requirements. Key performance objectives and targets will be set and reviewed to direct the efforts of the organization to reduce, reuse, recycle and preserve our natural resources.

ENVIRONMENTAL REPORTING
Qorvo discloses its climate change and water security impacts through CDP, a global non-profit that runs the world’s leading environmental disclosure platform. CDP drives companies and governments to reduce their greenhouse gas emissions, safeguard water resources and protect forests. Over 9,600 companies with more than 50% of global market capitalization disclosed environmental data through CDP in 2020.

GOVERNANCE
Oversight of Qorvo’s ESG program, including climate change, resides within the Governance and Nominating Committee. Climate related risks and opportunities are reviewed and taken into consideration when guiding overall business strategy, which includes budget allocation for large climate-related projects. At the leadership level, the VP of Global Operations is assigned environmental business objectives, with remuneration fixed to the achievement of such objectives. Day-to-day management of climate related risks reside within Corporate Site Services. EHS managers at Qorvo’s manufacturing and assembly locations are tasked with implementing, monitoring, and reporting on the progress of such objectives.

STRATEGY
Climate change has the potential to impact Qorvo business through mostly physical (both acute and chronic) and regulatory risks (short-term and long-term effects). Our operations in warmer climates could see an increase in HVAC costs related to the change in temperature. Additionally, severe weather events such as flooding and drought could result in business interruption. From the regulatory side, an increase in local and/or national regulations may impact our manufacturing process and/or subject the company to penalties.

In FY21, we commenced research tools such as climate modeling and “what if” scenarios to better understand our climate risk. We anticipate more engagement with these tools in the future. Additionally, the Science-Based Target (SBT) tool was used to model a 1.5 and 2 degree emission reduction target to understand how a SBT impacts operations.
**GOAL | GHG EMISSIONS**

Complete GHG reduction projects equal to 5% of total FY20 GHG emissions.

**PROGRESS TOWARDS GOAL**

Achieved. 18.9k tons; 5.9% of FY20.

**TARGET & PERFORMANCE**

To achieve our internal reduction goals, 11 GHG-related projects were initiated across sites with three focused on Scope 1 reductions and eight focused on Scope 2 reductions. The results of the initiatives allowed Qorvo to surpass the FY21 goal of a 5% reduction.

**OUR PLANET**

**CLIMATE CHANGE & ENERGY MANAGEMENT**

**RISK MANAGEMENT**

Qorvo performs an annual Enterprise Risk Assessment (ERA), which is designed to capture global business risks and provide input to the strategic planning process. Time horizons for these risk assessments are short-term and medium-term and have impacted short-term and long-term strategy at the operational level. This process looks at impact (financial & business), including climate-related risks and opportunities, versus likelihood (probability of occurrence) along with company preparedness. When looking at risk, direct operations, upstream, and downstream operations are included in the value chain and integrated into a multi-disciplinary company-wide risk management process.

**METRICS AND TARGETS**

Our near-term strategy is focused on process gas abatement projects to reduce our GHG footprint. Medium- to long-term strategies include renewable energy options to impact Scope 2 emissions. For FY21, 11.6% of supplied electricity was identified as renewable energy. We continue to research renewable energy options and partner with customers who require renewable energy for their products.
TARGET & PERFORMANCE

In Hillsboro, Oregon, our GHG abatement project resulted in a 13,468 mt-CO2e reduction of Scope 1 emissions. In a similar project at our Richardson, Texas, location, we were able to reduce 23,007 mt-CO2e of Scope 1 emissions. Additionally, manufacturing process improvements at our Greensboro, North Carolina, location resulted in a 3,967 mt-CO2e reduction of Scope 1 emissions. Qorvo’s Scope 2 projects were focused on process improvements and hardware upgrades across multiple locations.

In FY21, 5% reduction in overall energy usage year over year.

In FY21, 77% of total energy was purchased grid electricity. However, we were able to reduce total grid electricity consumption by 5% year over year.
Water is fundamental to semiconductor manufacturing. It is used at numerous steps in the manufacturing process, and therefore, sufficient available quantities of good quality freshwater and recycled water is vital to our business. Water risks are part of the company-wide annual risk assessment system and we consider water risk three to six years in the future. Tools utilized to complete the risk assessment include company methods, external consultants, and open-source databases such as the FEMA floodplain database and Aqueduct Country Ranking.

No water-related risks have been identified as having a substantive financial or strategic impact on business; however, 25% of Qorvo’s total manufacturing and assembly locations are in an area classified as “4” or extremely high risk for baseline water stress.\(^2\)

\(^1\)100% of Qorvo manufacturing and assembly locations monitor water consumption and discharge and provide reporting on a quarterly basis. Water consumed in operations was calculated by subtracting waste water and sanitary water from total water withdrawn. Our FY21 absolute water withdrawal increased 0.3% compared to FY20 due to our manufacturing growth.

\(^2\)Aqueduct Country Ranking report defines “baseline water stress” as the ratio of total water withdrawals to available renewable water supplies. Water withdrawals include domestic, industrial, irrigation, and livestock consumptive and non-consumptive uses. Available renewable water supplies include surface and groundwater supplies and considers the impact of upstream consumptive water users and large dams on downstream water availability. Higher values indicate more competition among users.

**GOAL | WATER CONSERVATION**

Complete water conservation projects equal to 2% of total FY20 water withdrawal.

**PROGRESS TOWARDS GOAL**

Achieved. Water savings projects resulted in 3.7% (23.5 million gallons) of water saved.
Hazardous and non-hazardous waste is accumulated at our manufacturing locations. In our office environment, we encourage recycling and make the following available for our workers:

- Battery and light bulb disposal
- Plastic, glass, paper, cardboard, cans and bottles drop off locations
- Annual e-waste events (in conjunction with Earth Day)
- Coffee grounds as compost for workers to use at home

Reduction in consumption is also important. We encourage our employees to think before printing and suggest substitutions to single use paper products. Our Qorvo store offers employees Qorvo branded mugs and water bottles as an alternative to paper or styrofoam cups.

**GOAL | WASTE REDUCTION**

Complete waste reduction projects equal to 3% (250k pounds) of total FY20 waste.

**PROGRESS TOWARDS GOAL**

Achieved. 13% diverted through projects.

**TARGET & PERFORMANCE**

When it comes to hazardous waste, Qorvo complies with all legal and regulatory frameworks in the countries of operation. As a company, we understand the risk associated with hazardous waste and are committed to:

- Minimizing the use of hazardous materials
- Ensuring the safe use of hazardous materials
- Ensuring the proper disposal of all hazardous waste. To date, Qorvo monitors 100% of hazardous waste vendors to ensure proper disposal of product
Qorvo sites engaged in multiple waste reduction projects throughout the year. At our Hillsboro, Oregon, location we implemented a styrofoam recycling stream, which resulted in eliminating our styrofoam to landfill waste. Qorvo sent 780 cubic feet of styrofoam to a recycling vendor that creates renewal paths for end-of-life plastics. Our Richardson, Texas, site took on the challenge to find a company that could utilize the chemical properties of our used solvent materials; thereby excluding the solvent from a waste classification.\(^1\) Qorvo was able to ship over 750,000 pounds of clean solvent for continuous use.

\(^1\) To not be considered “hazardous,” the EPA and Texas regulations stipulate that the solvent must be recycled and have beneficial reuse or continuous use.
Qorvo Cares is our commitment to cultivating good – goodwill, good connections and good fun – all to build strong communities among Qorvo employees and the world around us.

- **Community engagement** – Engaging with and giving back to the places we call home is the ultimate definition of good. The Qorvo Cares Community Engagement program provides our employees opportunities to get out in the neighborhood and spread kindness, generosity and support. The program focuses on three main areas: STEM education, good neighbor relations and environmental stewardship.

- **Employee events** – Innovation thrives at Qorvo, especially when we take a break for fun. From site picnics and holiday parties to wellness fairs and 5K run/walks, we celebrate healthy minds and strong bodies, all while building lasting connections.

To learn more visit qorvo.com/about-us/our-communities.
HILLSBORO, OR
In FY21, Qorvo partnered with @WithLoveOregon to donate funds and new STEM books/toys for our local foster community. Our employees delivered 140 items to provide foster children with things necessary during these difficult times.

GREENSBORO, NC
We are elated to contribute to Chase’s Chance “Closing the Gap on Technology” program! The funding from this effort goes directly to purchasing electronics to help close gaps in education.

RICHARDSON, TX
Qorvo is proud to continue our partnership with the North Texas Food Bank by holding a virtual and on-site food drive. Qorvo employees donated funds and 626 pounds worth of food.

APOPKA, FL
Qorvo Apopka once again partnered with the local police department for Shop with a Cop. This event gives $100 to 100 financially challenged children in the Apopka area to shop for whatever they need.

The program is comprised of three main areas:
• STEM Education – Inspiring the next generation
• Good Neighbor Relations – Strengthening communities
• Environmental Stewardship – Helping shape a better future
